

CASE STUDY

Client: **Dave Chapman LTD**

Location: **Ipswich**

Product: **ATLBay (Class 4) Installation**

METHODS

V-Tech were delighted to install the ATL bay (Class 4) for Dave Chapman LTD. A thriving local business Dave Chapman LTD, specialises in vehicle services, MOT, mechanical problems and tyres. The V-Tech ATL bay installation includes, BM 4010 Brake Tester, Head Lamp Aligner, Gas Analyser, Smoke Meter, Scissor Lift, 2 Post Lift and Jacking Beam.

All the equipment we install at V-Tech comes with full DVSA approval. The lift is a European Scissor Lift, Electro Hydraulic model, built in Play Detectors and full safety features, including pressure safety valves and mechanical locking system. This is a very popular lift for MOT and ATL bay installations, hard wearing and reliable with an additional 2 ton manual jacking beam, the lift also comes with radius plates built into the runners next to the play detectors. Other features include a wired remote control which doubles as a flash-light for checking the underside of the vehicle.
